

LexFUN! Consignment Sale Pricing Guidelines

www.myconsignmentmanager.com/lexfun

How to Price Your Items So They Will Sell

Get In The Consignment Mindset

- Think about what you would pay for your items right now, NOT what you paid for it.
 - *Remember: buyers look for value-priced items.*
- Price your items so that people really feel like they're getting a deal and your items will sell.

Things To Consider When Pricing

- Is it a name brand?
- What kind of shape is the item in? (like new? slightly worn? showing some wear?)
- What would it cost to buy the item new today?

Tips and Guidelines

- Use \$1 Increments and No Cents: Price items in \$1 increments (whole dollar amounts; no cents). Do not price items under \$1, instead bundle small items; e.g., two books for \$1.
- Print Guidelines: You might want to print these pricing guidelines before you enter items into our online system. The categories below correspond to the "category" fields in the system.
- Hangers: All clothes except pants, shorts and skirts should be on hangers. Clothes should be hung so that when you look at the item, the hanger forms a question mark.
- Attaching Tags: Make sure tags are attached securely to your items. Use a tagging gun or safety pins to tag clothes. Use packing tape for toys, equipment or anything hard and utilize ziploc baggies for anything with separate parts like games, toys, shoes, etc.

Reminder - We cannot accept any of following items for consignment:

- Car seats
- Cribs
- Children's clothes larger than size 12
- Ripped, stained clothing
- Outdated media (i.e. cassette tapes)
- Stuffed animals
- Violent toys such as guns or weapons
- Used bottles, pacifiers, teethingers or sippy cups
- Maternity clothing
